2.3 Everyday helpdesk stories

- *Understand the impact of everyday IT problems on work and studies*
- *Identify and use key vocabulary for troubleshooting and resolving common technical issues*

READING

Real-life helpdesk stories

1. **SPEAK** **Work in groups. Discuss how everyday IT problems can affect your work or studies. Think about printing, logging in, Internet connection or software updates.**

2. 13 **READ FOR GIST** **Read and listen to the three articles. Mark *True* (T) or *False* (F).**

Story 1: The Exam Printer Panic

a. The teacher needed the printer for exam papers. T / F

b. The exams were printed too late. T / F

Story 2: The Wi-Fi Mystery

a. The students couldn't connect to the Internet in the library. T / F

b. The students were angry when the Wi-Fi returned. T / F

3. **READ FOR DETAIL** **Read the articles again. Answer the questions.**

Story 1

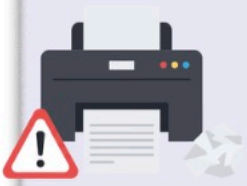

What happened with the printer and how did the teacher feel?

.....

Story 2

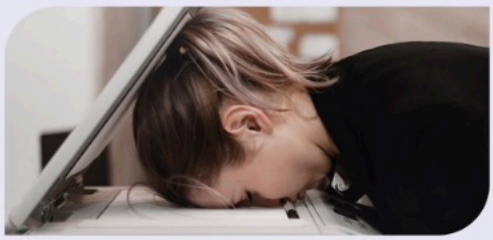

Why was the router unplugged and what did the technician do?

.....

Story 1: The Exam Printer Panic (Teacher)

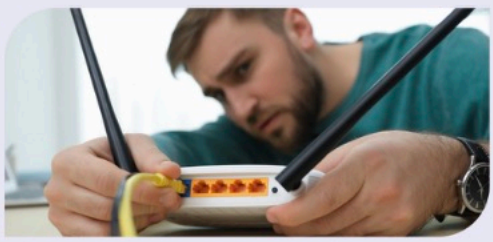

It was five minutes before my exam started, and I needed to print thirty papers. Suddenly, the printer made a terrible noise and stopped. I panicked because all the students were waiting! The technician came quickly and asked, 'Is the paper jammed?' I checked and yes, it was. He opened the tray, pulled out the stuck paper and restarted the printer. Luckily, the exams were printed just in time. I was so relieved. The class never knew how close we came to disaster!

Story 2: The Wi-Fi Mystery (Librarian)

One morning, ten students came to me at once: 'We can't connect to the Internet!' I was worried because they all needed to study. The technician checked the router and asked, 'Is the router plugged in and are the lights on?' I looked closer and laughed. Someone had unplugged the router to charge their phone! The technician reconnected it, restarted the router and the Wi-Fi came back. The students cheered, and I reminded everyone to please not unplug the router again!

VOCABULARY

Troubleshooting terms

4. 14 **READ FOR KEY WORDS** **Listen. Then match the definitions with the words.**

a. Something stops working and does not respond.	1. connection frozen
b. To start something again.	2. jammed
